Seismic Certification Parameters

Method of Certification: Analysis
Assessment Standard: IEEE 693-2018
Mounting Configuration: Base Mounted - Rigid
Building Codes: IEEE 693-2018
IEEE Level: High Design Level

Certification Terms

1. For specific models covered under this certification, see Table of Certified Components and Subcomponents accompanying this certificate.
2. This certification is dependent on proper mounting and anchorage in the listed mounting configuration(s). This certification does not specify anchorage design due to the variability of supporting structure and substrate conditions that may be present at the installation location.
3. Certified products are approved for the Building Codes listed and previous editions of those codes. Extension of this certificate to other Building Codes requires assessment of parameters by Pre Compliance. The seismic levels listed are valid for all soil types and seismic design categories.

Approval

I attest that I have impartially reviewed the documentation supporting this special seismic certification and have confirmed it is in general conformance with the referenced codes and standards and that it meets the listed seismic levels.
